

Task 4- a new app

This task was the semi-final of the apprentice. The pupils had to design a new app for smart phones/i-pads etc. It could have been educational, a game, quiz etc

Team Infinity came up with 'Bio Wild'. This app was aimed at students studying Biology. The app allowed them to design their own animal and lead it through a number of scenarios, where they could purchase additional features to ensure its survival. It was both fun and educational.

Team Platinum Evolution came up with the app 'Our House'. This was targeted at house sellers/buyers or someone just looking to decorate their house. The app allowed users to take a virtual tour of a house and attached ideas on how it could be decorated, along with shops and prices of products that would suit the house.

Both teams produced a presentation and created a video to explain the app further. It was extremely pleasing to see the effort that was put into this. The losing team will now face the board room on Friday!!
