1. Introduction

Our Lady and St Patrick's College, Knock aims to ensure that students with medication needs receive appropriate care and support at school. Most children with medication needs are able to attend school regularly and, with some support from the school, can take part in the majority of school activities. A positive response by the College to a student's medication needs will not only benefit the student directly, but can also positively influence the attitudes of others. The College's Administration of Medication in School Policy reflects the guidance and procedures set out in Supporting Pupils with Medication Needs (DE/DHSSPS, 2008) and the documents listed on Page 8.

2. Aims

1. To ensure that students with medication needs receive appropriate care and support.
2. To work in partnership with parents/guardians, health professionals and other agencies to provide a supportive environment for students with medication needs.
3. To encourage students to take responsibility for their own medication.
4. To ensure the safe storage and disposal of medication.

3. Categories of Medication Needs

Medication needs can be grouped into three categories:

- Students requiring short-term prescribed medication for acute conditions.
- Students with a long-term condition requiring regular medication.
- Students who may very rarely require medication to be given in an emergency.

Within each of these categories, medication may be self-administered, supervised or administered by a third party.

4. College First-Aider

The College First-Aider, supported by a number of staff, oversees first-aid provision and the administration of medication in the College. Students, parents and staff may liaise with the College First-Aider in Medical Inspection (Level 2) or by telephone (028 9040 1184 - Extension 216).

College First-Aider	Mrs Claire Hughes
---------------------	-------------------

5. Legal Duty and Indemnity

The Principal, Vice Principals and teachers are not contractually required to administer medication to students. This is a voluntary role, although some non-teaching staff are employed on contracts which require them to carry out certain medical procedures. If a member of staff administers medication to a student, or undertakes a medical procedure to support a student and, as a result, expenses, liability, loss, claim or proceedings arise, the College will indemnify the member of staff provided the member of staff follows the procedures set out in this policy and the procedures outlined in the student's Individual Medication Plan (Form AM1), and/or written permission from parents.

6. Confidentiality

College staff should treat medical information confidentially. Relevant staff should consult with the parent, or the student, if appropriate, as to who else should have access to information about the student's medical needs. Pastoral staff should also consider how much other children in the student's class should know about a particular student's chronic condition. It is important that the College does not disclose details of a student's condition to other students without the consent of the parent and the student him/herself, if appropriate. When consent is given, the situation should be handled as sensitively as possible.

7. Roles and Responsibilities

The College is committed to working in partnership with parents/guardians, health professionals and other agencies to provide a supportive environment for students with medication needs.

Parents and Those with Parental Responsibility:

- 7.1 Parents should keep their children at home if acutely unwell or infectious.
- 7.2 Parents are responsible for providing the College with comprehensive information regarding the student's condition and medication.
- 7.3 Prescribed medication will not be accepted in school without complete written and signed instructions from a parent (Form AM2/Form AM3).
- 7.4 Staff will not give a non-prescribed medicine to a child unless there is specific prior written permission from a parent.
- 7.5 Only reasonable quantities of medication should be supplied to the College (for example, a maximum of four weeks' supply at any one time).
- 7.6 Each item of medication must be delivered to the College First-Aider, in normal circumstances by the parent, in a secure and labelled container as originally dispensed. Each container must be clearly labelled with the following information.
 - Student's name
 - Tutor group
 - Name of medication
 - Dosage
 - Frequency of administration
 - Date of dispensing
 - Storage requirements (if important)
 - Expiry date

The College will not accept medication in unlabelled containers.

- 7.7 It is the responsibility of parents to notify the College First-Aider in writing if the student's need for medication has changed or ceased.
- 7.8 It is the parents' responsibility to renew the medication when supplies are running low or expiring and to ensure that the medication supplied is within its expiry date.
- 7.9 The College First-Aider will not dispose of medicines. Medicines, which are in use and in date, are available for collection by the parent at the end of each academic year.

The College:

- 7.10 Medication will be kept in a secure place, out of the reach of students. Unless otherwise indicated, all medication to be administered in school will be kept in a locked cupboard or a fridge in Medical Inspection.

- 7.11 The College First-Aider will keep a Record of Medication Administered to an Individual Child (Form AM4), which she will have available for parents.
- 7.12 If students refuse to take medication, the College First-Aider will inform a parent of the refusal as a matter of urgency. If a refusal to take medication results in an emergency, the College's emergency procedures will be followed.
- 7.13 For each student with long-term or complex medication needs, the College First-Aider will ensure that an Individual Medication Plan is drawn up, in conjunction with the appropriate health professionals.
- 7.14 It is the responsibility of the College First-Aider to check the expiry dates of medication and to alert parents when supplies are running low or medication needs replaced.
- 7.15 Where it is appropriate to do so, students will be encouraged to administer their own medication, if necessary, under the supervision of the College First-Aider or another designated member of staff. Parents will be asked to confirm in writing (Form AM3) if they wish their child to carry their medication with him/her in school.
- 7.16 Staff who volunteer to assist in the administration of medication will receive appropriate training/guidance through arrangements made with the College First-Aider/School Health Service.
- 7.17 The College will make every effort to continue the administration of medication to a student whilst on educational visits away from the school premises, even if additional arrangements might be required. However, there may be occasions when it may not be possible to include a student on an educational visit if appropriate supervision cannot be guaranteed.
- 7.18 Staff will be made aware of the procedures to be followed in the event of an emergency.
- 7.19 Where there is concern about whether the College can meet a student's medication needs, or where the parents' expectations appear unreasonable, the Principal should seek advice from the School Health Service/Designated Medical Officer. On the basis of information received, the Principal will advise parents of a child with medication needs on the level of support the College will provide.

8. Storing Medication

The College First-Aider is responsible for making sure that medication is stored safely in a locked cupboard or a fridge in Medical Inspection. However, some medication, such as spare inhalers for asthma and EpiPens®, should not be locked away. Medication should be stored strictly in accordance with product instructions, (paying particular note to temperature), and in a secure and labelled container as originally dispensed. The College First-Aider should ensure that the supplied container is clearly labelled with the student's name, tutor group, the name of the medication, dosage, frequency of administration, date of dispensing, storage requirements and expiry date.

9. Controlled Drugs

The supply, possession and administration of some medicines are controlled by the Misuse of Drugs Act and its associated Regulations. Misuse of a controlled drug, such as passing it to another student for use, is an offence. The College will implement its Drugs Policy in the event of misuse of a controlled drug.

10. Access to Medication

Students must have access to their medication when required. They should know where their own medication is kept and who holds the key. Some medicines, such as spare inhalers for asthma and EpiPens®, must be readily available to students and should not be locked away. Students are required to carry their own inhalers/EpiPens® in accordance with their Individual Medication Plan. A spare inhaler/EpiPen® will be kept in Medical Inspection.

11. Administration of Medication

11.1 Administration of Prescription and Non-prescription Medication

Prescription and non-prescription medication as outlined in 7.6 will be administered in Medical Inspection under the supervision of the College First-Aider or another designated member of staff. The College First-Aider will keep a record (Form AM4) of the date, time and dosage of the administration of medication.

11.2 Administration of Analgesics (painkillers)

Paracetamol may be administered at the discretion of the College First-Aider with the written consent of a parent. The College First-Aider will keep a record (Form AM5) of the date, time and dosage of the administration of paracetamol.

12. Disposal of Medication

College staff should not dispose of medication. Medication, which is in use and in date, should be collected by the parent at the end of each academic year. Parents are responsible for the disposal of date expired medication. Date expired medication or those no longer required for treatment should be returned to the parent immediately for transfer to a community pharmacist for safe disposal. Sharps boxes should always be used for the disposal of needles. Collection and disposal of the boxes should be arranged by the College First-Aider with the School Health Service.

13. Emergency Medication

The College First-Aider will administer medication in an emergency. In the absence of the College First-Aider, staff are expected to use their best endeavours at all times in emergencies. In general, the consequences of taking no action are likely to be more serious than those of trying to assist in an emergency. Possible medical emergencies may include severe burns, acute asthmatic attack, diabetic hypoglycaemic attack, anaphylactic reaction or prolonged epileptic seizures. Where a student experiences an emergency event with no relevant previous history, staff are expected to take all reasonable steps within their own competencies and experiences to assist the student and obtain the appropriate help. Where a student with a known medical condition and who has an Individual Medication Plan experiences a medical emergency, staff will be expected to follow the advice given in that Individual Medication Plan. When medication has been administered, emergency services should be called and parents informed. A student taken to hospital by ambulance should be accompanied by a member of staff who should remain until the student’s parent arrives. The incident should be fully recorded.

In all emergency situations a teacher or other member of school staff will be expected to act as a responsible adult or parent in the best interests of the child in recognition of his/her duty of care.

The emergency services should be contacted if appropriate.

14. Emergency Defibrillators

The College has four emergency defibrillators which are located at Reception, in the Physical Education Department, at the 3G pitch and on the external Home Economics wall above the grass pitch. The following staff have been trained in the use of emergency defibrillators. It should be noted, however, that emergency defibrillators deliver spoken instructions which can be followed by anyone present.

• Mr H Austin	• Miss D McLaughlin
• Mrs C Hughes	• Miss R Spence
• Mr S Hughes	• Mrs E Wilson
• Mrs R Martin	

15. Educational Visits

The College aims to encourage students with medication needs to participate in educational visits, wherever safety permits. It should be accepted, however, that there may be occasions when it may not be possible to include a student on an educational visit if appropriate supervision cannot be guaranteed. Staff supervising educational visits should always be aware of any medication needs, and relevant emergency procedures. **A copy of any Individual Medication Plan should be taken on educational visits in the event of the information being needed in an emergency.**

16. How to Raise a Concern or Make a Complaint about the Administration of this Policy

If you have a concern or complaint about the administration of this policy please contact Ms McCarthy, Vice Principal, in the first instance. If necessary, you may then access and follow the College's Complaints Procedure which is available on the College website at www.knock.co.uk. Should you remain dissatisfied with the College's response after completing the internal complaints procedure, you can bring your complaint to the Northern Ireland Public Services Ombudsman within six months. Contact details for the Northern Ireland Public Services Ombudsman are provided on Page 11 of the Complaints Procedure.
